Welcome back to what is always a busy time of the year. Thank you to all the parents that came to the P & C meeting on Monday to offer their assistance this term. The cultural day is approaching fast and with 250 kids here from 7 school all hands will be needed to make sure the day runs as smoothly as possible.

This is my first chance to thank the students for running such an amazing world food day at the end of last term. The food and the decorations were fantastic. I am sure everyone that attended will agree they did a great job in planning, preparation and delivery.

The students' behaviour during swimming lessons has also been great. It is also amazing to see how independent they are when needing to get ready for the lessons and changed to go home.

Environment Day

We jumped on the bus. Then we walked to Lake Alexandria. We rushed to the other schools. Then we got into groups and then we learnt about animals and nature today. Firstly we went to the electricity place and then we learnt about the animals and where they live. We went over to the reptiles and we held them. We even got to hold the snakes. There were lizards and Bill dropped one and got into trouble. A few minutes later they gave Bill another chance. Then time was up, there was a grand finale. We jumped on the bus and headed back to school.
